

Challenge

Provide hardware solutions for demanding energy applications

Solution

Spincraft. *Your single-source delivering precision and quality*

Boston / Milwaukee

a **Standex** company

Spincraft manufactures high-strength, high-temperature and corrosion-resistant energy components ranging from 12" to 300". A world leader since 1918, Spincraft has provided manufacturing design and re-engineering assistance, making us an ideal source for both OEM and replacement parts.

Spincraft has two locations, each equipped with advanced metal spinning capabilities, precision multi-axis machining, multiple welding processes and project management. This enables each plant to produce high-quality, reliable and cost-effective energy components.

Innovative Products

Spincraft offers manufacturing solutions for energy applications that have a proven track record, including:

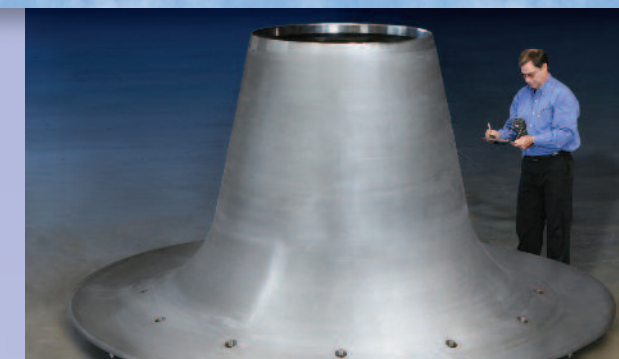

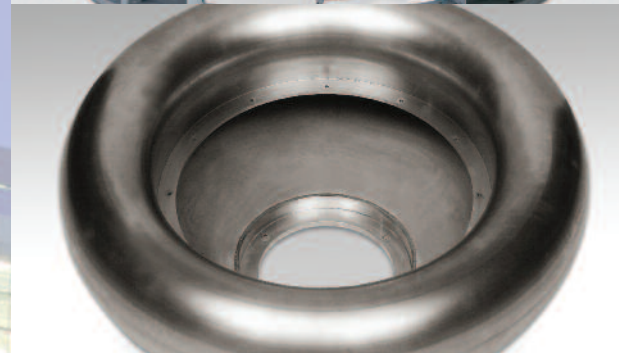

- Exhaust Diffuser Assemblies
- Combustor Assemblies
- Power Turbine Inlet Components
- Inlet Scroll Assemblies
- Steam Turbine Flow Guides
- Gas Turbine Combustor Liners
- Customized Components

Our Process

To produce perfection, we insist on having the best resources available for every step of our engineering and manufacturing process, which includes our people, service, equipment and raw materials.

Spincraft's unmatched capabilities include:

- Manufacturing expertise in virtually all metals and alloys
- Highly-advanced forming, fabricating, expanding, metal spinning and assembly capabilities
- Heat-treating with certified air and inert atmospheres to 18' sq. x 10' high
- In-process monitoring with rigorous inspections at every step
- Electro-optical measuring utilizing state-of-the-art software to assist in CAD modeling and remote measurement engineering services
- Large, multiple-axis machining centers

Our Team (Integrated Design Development)

Experts in the field of High-Performance Metal Working.

- Engineers experienced in project management from conception through completion
- The most highly-skilled operators in the precision manufacturing industry
- A staff committed to dynamic and responsive customer service

Spincraft Delivers

We at Spincraft are continuously investing in our facilities and the people needed to produce high-quality, precision-fabricated energy solutions. Staffed with experts in engineering and metal working, we ensure that your products will perform reliably and to their optimum performance level.

Spincraft is AS 9100 Registered, ISO 9001:2008 Registered, and NADCAP Welding and Heat Treat certified.

Spincraft...the only things we can't fabricate are our success stories.
